Latest news

Updated programme with all **technical sessions** now available on the [website](#)! Amongst the high-level speakers we have confirmed: Tom Enders (President and CEO Airbus), Antonio Vázquez (CEO of Iberia) and Johann-Dietrich Wörner (Chairman of the Executive Board DLR).

Register this week up to 1st March and benefit from the reduced fee!

7 high level sessions and 56 technical and policy parallel sessions configure the complete programme of Aerodays 2011

More than 300 speakers will participate at the Sixth European Aeronautics Days, coming from both institutional and industrial entities from all Europe and overseas.

The **plenary sessions** will focus on the sustainability of air transport, how the global market is evolving, mastering the future of aeronautics and the future of air traffic management. These topics will be presented by high level representatives of the main aeronautics stakeholders and will be aligned with the Research and Innovation goals in the European Union.

The **technical programme** includes up to 56 parallel sessions related to the following strategic activities of the European RTD Seventh Framework Programme:

- Protection of aircraft and passengers
- Ensuring customer satisfaction and safety
- Greening the air transport system
- Improving cost efficiency
- Increasing time efficiency
- Pioneering the air transport of the future

Besides, there will be several **parallel sessions** dedicated to some specific issues:

- European Research Area
- International Cooperation
- Research and Innovation Policy
- Clean Sky
- SESAR

Also, the winners of the [Young Scientists Competition](#) will have the opportunity to present their projects in a dedicated session.

Practical information

When: Aerodays 2011 take place from 30 March to 1 April

Where: Madrid, Spain (Palacio Municipal de Congresos).

Conference participants will have access to:

- conference exhibition;
- technical and plenary [sessions](#);
- conference dinner and cocktails;
- [technical visits](#), showcasing air transport facilities in and around Madrid.

[Register](#) now to secure your reservation!

Register now to the Brokerage Event and look for new business opportunities!

More than 500 bilateral meetings between aeronautics related companies and other institutions are expected to take place during [Aerodays 2011](#).

Don't miss the chance to improve your possibilities for international [cooperation](#) and to find new business opportunities. [Read more...](#)

The exhibition at Aerodays 2011

All participants will have the opportunity to enjoy a complete visual exhibition, grouped in:

- EC projects stands
- Sponsors and collaborators stands
- Hardware models of latest aeronautics developments
- Posters and prototypes reflecting the students projects presented to the Young Scientists Competition
